

YOU NEED FLEXIBILITY ?

**YOU WANT TO REDUCE ELECTRIC
POWER CONSUMPTION ?**

**The "FAIR FLOW" brings you the
simple solution !**

VINADUCT JSC[®]

CARACTERISTICS :

- * Dimensions (mm) : 1000 (W) x 1050 (H)
Alternative heights : 750, 900, 1200 mm
- * Length : modular sections of 1130 mm
- * Material : Galvanised Steel (2mm)
- * Chain : double "S55" chain with scrapers (every 1000mm)
- * Included 5mm flanges between every modular section

ASSEMBLING :

- * Traction and tension section :
Pre-assembled at our factory
- * Modular sections :
 - 6 flat panels / section
 - easy assembling by M10 bolts & nuts
- * Access doors on both ends
- * Suitable for all kind of rotary valves

FLEXIBILITY :

- * Add / remove machines :
no limitations on volume or quantity
- * Extend or reduce :
thanks to the modular construction,
the tunnel can be extended on later stage

REDUCE POWER CONSUMPTION :

- * Improved efficiency fan :
Due to the pre-separation of the chips,
it is possible to use dusty air fans with
reasonably higher efficiency !
- * Frequency converter :
Combine your Fair Flow with automatic
sliding dampers and a frequency converter,
and your power consumption drops down !
